

Electricity Consumption Analysis Dashboard

Customer Journey Map

Based on interviews and observations with data analysts & energy researchers

SCENARIO												
Exploring, analyzing and understanding electricity consumption data across Indian states using an interactive Tableau dashboard.												
	Entice How does someone initially become aware of this dashboard?	Enter What does people want to do as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?							
Steps What does the person (or group) typically experience?	Learn about the dash board from report / class / colleague	Understand purpose of analyzing electricity data	Open the Tableau dashboard	Select filters (Year / State / Region / Quarter)	View state-wise consumption map	Analyze trends (monthly / yearly / quarterly)	Compare regions and top / bottom states	Explore COVID-19 lockdown impact and recovery	Summarize key insights	Download / Share dashboards or reports	Use insights for reports / projects / decisions	Re-visit dashboard for new data updates
Interactions What interactions do they have at each step along the way? • Things: What digital touchpoints or physical objects would they use? • Places: Where are they? • People: Who do they see or talk to?	Talk to professor / colleague College / Office / Home	Read project documentation or description Project guide / Faculty	Interact with Tableau Dashboard Laptop / Desktop with Tableau Public / Desktop	Use filter dropdowns, search boxes Dataset (CSV) used in Tableau	Hover over map (tooltip) Dashboard interface	Click charts for details Charts (Line, Bar, Map, Pie)	Use graphs, legends, tooltips Data tables and filters	Apply date ranges & comparisons Benchmarks, legends, colors	Export as PDF / Image Report files	Share link with team / faculty Email / Google Drive / Teams	Discuss insights with team Meetings / Presentations	Use for future analysis and presentations Updated dashboard version
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Help me find reliable electricity data analytics	Help me understand consumption patterns easily	Help me access the dashboard quickly	Help me choose the right filters for my analysis	Help me see state wise consumption	Help me identify trends over time	Help me compare regions and states	Help me understand the impact of COVID-19	Help me get clear insights for my report	Help me save or share my findings	Help me use the insights for better decisions	Help me stay updated with new data
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Excited to find useful data for analysis	Dashboard looks clean and easy to understand	Filters are simple and user-friendly	Data loads quickly	Interactive map is engaging	Trends are easy to identify	Comparisons give valuable insights	Discovering impact of lockdown	Insights are clear and actionable	Easy to export and share results	Helps in decision making	Look forward to analyzing more data
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Hard to find reliable data sources	Not sure what information is available	Too many filters confusing at first	Data takes time to load on slow internet	Some charts are complex to interpret	Too much data makes it overwhelming	Tooltips or labels not clear sometimes	Comparison options limited in some views	Export options not working sometimes	Formatting issues in downloaded reports	Dashboard not updated with latest data	Need training for advanced analysis
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Promote dashboard with clear description and sample insights	Provide tutorial video for new users	Simplify filter options	Add search and reset filter buttons	Provide data definitions and explanations	Add more comparisons (e.g., per capita)	Add forecasting or future projections	Improve mobile view and performance	Add one-click export in multiple formats	Auto-generate insight summary	Enable data updates automatically	Add alert / email for new data updates
