

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	15 July 2026
Team ID	
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & Idea Prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- ⌚ 30 minutes to prepare
- 👥 1 hour to collaborate
- 👤 2-8 people recommended

1 Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

**Team gathering**

Invite who should participate in the session and send an invite. Share session information (or pre-work ahead).

**Set the goal**

Think about the problem you're focusing on solving in the brainstorming session.

**Learn how to use the facilitation tools**

Use the **Facilitation Superpowers** to run a happy and productive session.

2 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

How might we analyze electricity consumption patterns across Indian states to identify trends and the impact of COVID-19?

Key rules of brainstorming

To run a smooth and productive session.

-  Stay on topic
-  Encourage wild ideas
-  Defer judgement
-  Listen to others
-  Go for volume
-  4 pencils, no vocal

Step-2: Brainstorm, Idea Listing and Grouping

1 Brainstorm

Write down any ideas that come to mind that address your problem statement.

⌚ 10 minutes

Aim for as many ideas as possible. No idea is a bad idea at this stage.

2 Group Ideas

Take time reviewing your ideas while clustering similar or related notes as you go. In the next 10 minutes, give each cluster a sentence that label it to create a bigger theme so it's easy to read.

⌚ 10 minutes

Tip: Look for common themes in ideas. Group similar ideas together to identify key focus areas.

Brainstormed Ideas:

- State-wise electricity consumption map
- Region-wise electricity consumption comparison
- Monthly consumption trend (2019 vs 2020)
- Year-wise electricity consumption analysis
- Quarter-wise electricity consumption analysis
- Top 10 electricity consuming states
- Bottom 10 electricity consuming states
- Impact of COVID-19 lockdown on consumption
- Recovery trend after lockdown
- Interactive story to present insights

Grouped Ideas:

- Group 1: Geographic Analysis**
 - State-wise electricity consumption map
 - Region-wise electricity consumption comparison
- Group 2: Time Analysis**
 - Monthly consumption trend (2019 vs 2020)
 - Year-wise electricity consumption analysis
 - Quarter-wise electricity consumption analysis
- Group 3: Comparison Analysis**
 - Top 10 electricity consuming states
 - Bottom 10 electricity consuming states
- Group 4: COVID Analysis**
 - Impact of COVID-19 lockdown on consumption
 - Recovery trend after lockdown
- Group 5: Presentation**
 - Interactive story to present insights

Step-3: Idea Prioritization

1 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on the grid to determine which ideas are important and which are feasible.

⌚ 20 minutes

High Priority (Important + Feasible)

Medium Priority (Moderate Importance/Feasibility)

Low Priority (Low Importance/Feasibility)

Tip: Place ideas in the grid to identify high priority ideas (important + feasible). Focus on the ideas in the top-right area.

Importance
How valuable or impactful is the idea for solving the problem?

Feasibility
How easy or possible is it to implement?

Ideas in the Matrix:

- High Importance, Low Feasibility (Medium Priority):**
 - Quarter-wise electricity consumption analysis
 - Recovery trend after lockdown
- High Importance, High Feasibility (High Priority):**
 - State-wise electricity consumption map
 - Region-wise electricity consumption comparison
 - Monthly trend (2019 vs 2020)
 - Impact of COVID-19 lockdown
 - Top 10 electricity consuming states
 - Year-wise electricity analysis
 - Bottom 10 electricity consuming states
 - Interactive story to present insights
- Low Importance, Low Feasibility (Low Priority):**
 - Advanced forecasting of electricity demand
- Low Importance, Medium Feasibility (Low Priority):**
 - Predictive model for future consumption
- Low Importance, High Feasibility (Low Priority):**
 - Real-time electricity consumption monitoring
 - AI/ML based anomaly detection
